ROADWAY PRESERVATION FOR VINEYARD CITY

PAVEMENT LIFE

WITHOUT PRESERVATION

- Roads are left to deteriorate until they fail.
- Typical asphalt pavement may last 12–15 years before major reconstruction is needed.
- The cost to repair skyrockets.

WITH PRESERVATION

- Regular treatments (chip seal, slurry seal, crack sealing, overlays) keep roads in good or fair condition.
- Extends pavement life to 25–30 years or more.
- Saves up to 6x in costs over the life cycle.

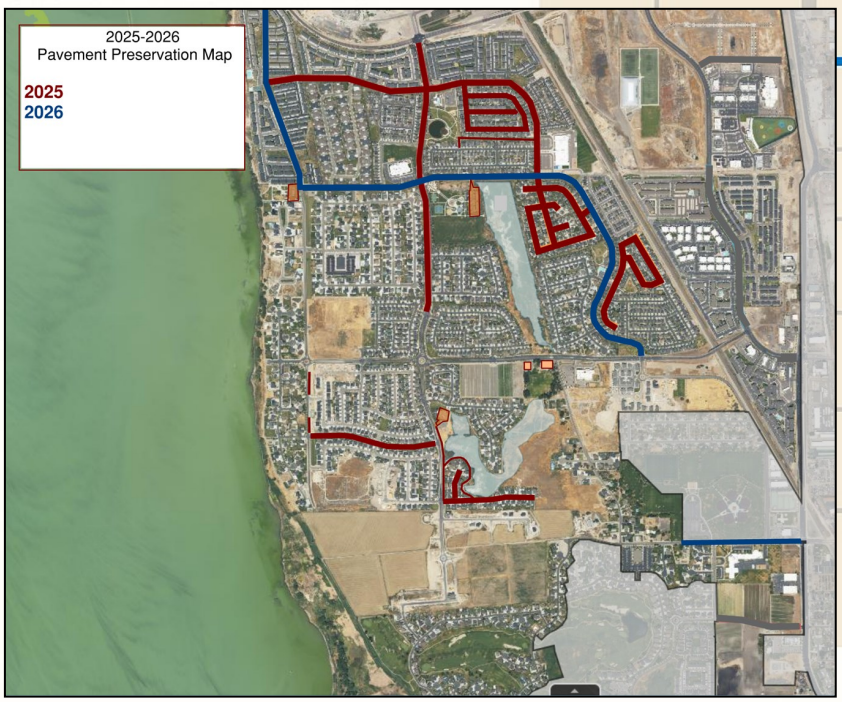

PROACTIVE PAVEMENT PRESERVATION

- **Keeps good roads good:** focuses on maintaining existing roads before major deterioration.
- **Cost-effective:** $1 spent today can cut long-term maintenance costs in half.
- **Efficient treatments:** chip seals, slurry seals, asphalt overlays, and crack sealing extend pavement life.
- **Quick application:** faster and less disruptive than full reconstruction.
- **Right treatment, right time:** greatest value when applied to roads in fair-to-good condition.

What Does Pavement Preservation Mean for Residents?

- **Fewer Disruptions** – Shorter, less invasive projects compared to major road reconstruction.
- **Smoother, Safer Roads** – Well-maintained surfaces reduce wear on vehicles and improve driving comfort.
- **Tax Dollars Saved** – Preventive maintenance is far less expensive than rebuilding roads, stretching Vineyard's $380K annual budget further.
- **Better Neighborhood Quality** – Clean, safe streets improve the look and feel of the community.
- **Predictable Projects** – Preservation allows the City to plan projects in advance and share schedules with residents.

IMPROVED COMMUNICATION

INFORMATION
- Interactive project map for residents
- HOA board updates
- Overflow/off-street parking info online & flyers

EDUCATION
- "**$1 today saves $6 tomorrow**" campaign
- Neighborhood ambassadors share info

COORDINATION
- Pavement schedule updates to City Council

FUNDING

- Funded localy by Vineyard City
- Sources: Class B & C Road Funds + City General Fund
- Focus: Preservation over costly reconstruction
- **Budget: Approx. $380,000 annually**
