Update #2 | July 24, 2026

VINEYARD
STAY CONNECTED

Vineyard Regional Trail Enhancements

Lakeside Park and 400 South

Upcoming Work Activities

- Crews have started paving the Lakeside Park parking lot.
- Crews also began demolishing the south side of the intersection to prepare to install traffic lights and signs.
- Next week, crews will place sod near the intersection and perform microsurfacing treatment which extends the life of asphalt.

**Construction schedules are subject to change due to weather or other unforeseen circumstances.*

Notice of Lane Closures

- On Monday, July 27, crews are going to be excavating the road in the right turn lanes on 620 East to prepare for paving. This work is expected to take approximately one week to complete.
- To accommodate this work, traffic patterns will change at the 620 East and 400 South intersection:
    - At least one lane in each direction will be maintained on 400 South

- There will be no left-hand turn onto southbound 620 East from westbound 400 South
- There will be no right-hand turns on or off of 620 East at 400 South
- Northbound traffic on 620 East will be able to turn left only onto 400 South
- Residents in the area should take 575 South to Lakeview Drive to go east on 400 South

Center Street and Holdaway Road

Upcoming Work Activities

- Crews have started to demolish the south side of the intersection on Center Street by removing the brick wall and curb.

**Construction schedules are subject to change due to weather or other unforeseen circumstances.*

Traffic Alerts

- Motorists can expect intermittent lane closures and one-way flagging operations Monday through Friday, 7 a.m. to 7 p.m. with weekend work as needed.
- Active transportation users (pedestrians, cyclists, etc.) will not be allowed in the construction areas.
- Detours during some phases of the project may be possible.

Safety

- For the safety of all park users, the work area will be fully fenced off. Please encourage your children to avoid the construction area, both during and outside of work hours.
- Local residents should exercise caution as they drive or walk through the construction zone. This is an active work zone, and conditions are constantly changing. Please pay attention to traffic control devices and instructions from crew members on-site. Remember to make eye contact with equipment operators before passing or crossing, to ensure they see you.

Project Background

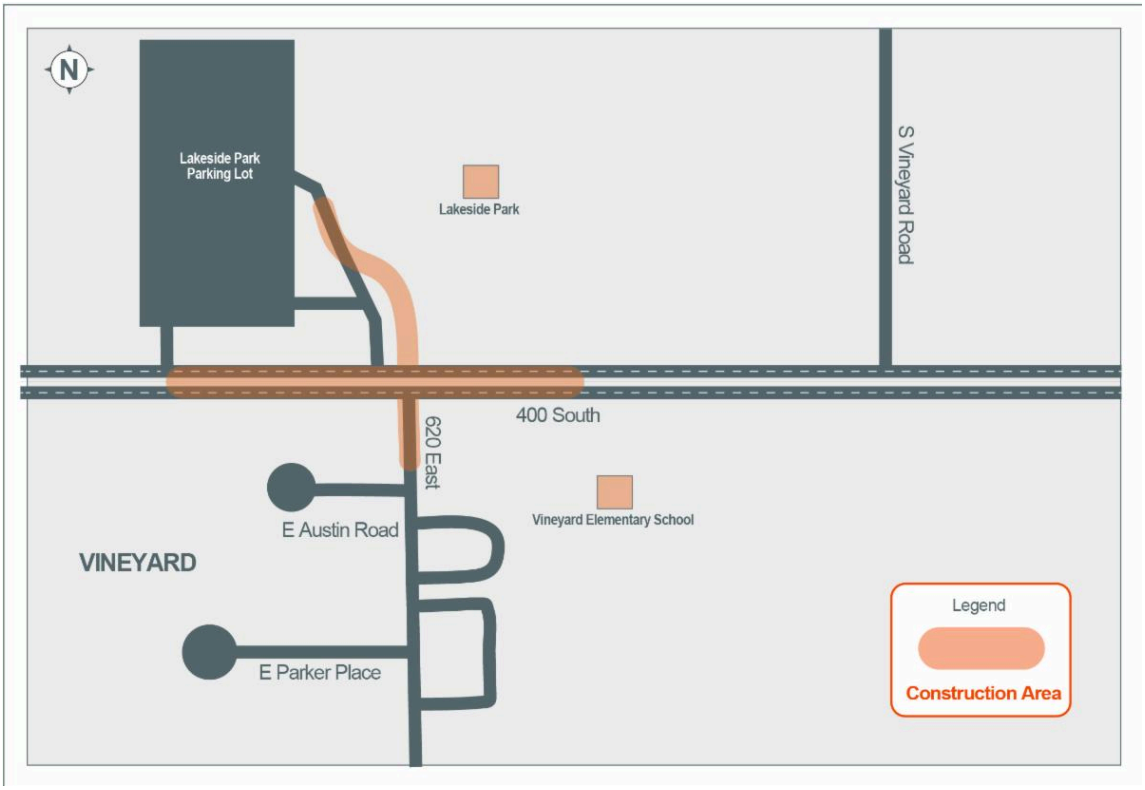

Vineyard City and Orem City, in partnership with the Mountainland Association of Governments, are conducting a project to make several improvements to their pedestrian and active transportation systems.

One part of the project is the addition of a lighted/flashing warning signal, known as a Pedestrian Hybrid Beacon, to the Center Street crosswalk just west of Franklin Discovery Academy (*see map below*). This will make it easier for drivers to notice pedestrians waiting to cross, or actively crossing, the street at the crosswalk.

The other piece of the project is to realign the 620 East and 400 South intersection, by moving the road entering the Lakeside Park parking lot slightly to the east (*see map below*). This also includes the installation of a traffic signal and crosswalks with updated road striping and signage.

This email is being sent by Consor on behalf of Vineyard City for the purposes of this project.
