REQUEST FOR PROPOSALS (RFP)

Residential Parking Permit Management and Enforcement Services in the City of Vineyard, Utah

Date Issued: June 29, 2026

Submission Deadline: July 30, 2026, at 11:59 PM Mountain Time

Proposals Shall Be Submitted Via Email To:

Brian Voeks, City Manager
Email: brianvo@vineyardutah.gov

and

Ed Kennedy, Code Enforcement Officer
Email: edk@vineyardutah.gov

1. INTRODUCTION

The City of Vineyard ("City") is soliciting proposals from qualified firms to provide a comprehensive residential parking permit management and enforcement program for designated neighborhoods within the City.

The selected vendor shall provide both:

1. A fully digital residential parking permit management platform; and
2. Parking enforcement services, including warning notices, vehicle immobilization (booting), and towing when authorized under City policy and applicable law.

The City's objective is to maintain neighborhood parking availability, improve compliance with parking restrictions, and provide fair, transparent, and consistent enforcement while avoiding predatory towing practices. The City seeks a vendor that emphasizes customer service, resident communication, technology-driven solutions, and progressive enforcement measures.

The selected vendor shall provide a solution that:

- Improves parking compliance in designated neighborhoods;
- Minimizes unnecessary towing;
- Provides a fully digital permit management system;
- Supports residents and guests through an easy-to-use platform;
- Provides transparency and accountability in enforcement;
- Protects resident data and privacy;
- Supports City oversight of enforcement actions; and
- Complies with all applicable federal, state, and local laws.

The anticipated contract term shall be a three (3) years initial term, with automatic annual renewals thereafter. Either party may terminate the agreement with thirty (30) days' written notice.

All procurement activities shall comply with applicable Utah law and City policy.

The City reserves the right to take the following actions:

- Reject any or all proposals.
- Waive informalities.
- Request additional information.
- Conduct interviews.
- Award based on best value rather than lowest cost.
- Negotiate final contract terms with the selected proposer.
- Cancel the solicitation at any time.

---

2. SCOPE OF SERVICES

Proposers shall indicate whether they can provide all services described in this Section 2, SCOPE OF SERVICES. If a proposer is unable to provide any portion of the scope, the proposal shall clearly identify the omitted service(s) and describe the proposed alternative method for delivering those services. Such proposals will remain eligible for consideration at the City's discretion.

A. Digital Permit Management Platform

The vendor shall provide a fully digital parking permit management system that includes:

- Online resident portal;

- Mobile-friendly platform;
- License plate-based permits;
- No physical permits required;
- Real-time permit database;
- Administrative dashboard for City personnel;
- Secure cloud-based system; and
- Audit trail of all permit transactions.

Residents shall be able to:

- Register vehicles;
- Manage permits;
- Update vehicle information;
- Request guest permits;
- Review permit history; and
- Receive notifications regarding permit status.

B. Permit Structure

The system shall support:

- Up to three (3) permits per household;
- City-controlled adjustment of permit limits;
- Guest parking functionality;
- Temporary permits;
- Short-term visitor permits; and
- Special-event guest permits, if desired by the City.

The City reserves the right to modify permit policies without requiring significant system redevelopment.

C. Enforcement Services

The vendor shall provide enforcement personnel, equipment, and operational support necessary to enforce City-approved parking regulations within designated neighborhoods. All enforcement activities shall comply with applicable Utah law. Vendor personnel shall be capable of:

- License plate verification;
- Permit validation;

- Documentation of violations;
- Issuance of warning notices;
- Vehicle immobilization (booting); and
- Towing services when authorized.

D. Progressive Enforcement Requirements

The City seeks a progressive enforcement model designed to encourage compliance while minimizing unnecessary towing.

First Violation

The first documented violation shall result in a warning notice only. The warning notice shall:

- Clearly identify the violation;
- Explain applicable parking restrictions;
- Include instructions for obtaining permits; and
- Include contact information for assistance.

Warning notices shall not be represented as City-issued citations. Warning notices shall clearly state they are vendor-issued notices and are not criminal, civil, or municipal citations.

Any warning notice affixed to a vehicle shall be designed to minimize inconvenience and prevent damage to vehicle surfaces. If adhesive materials are used, they must be readily removable without the use of razors, scrapers, solvents, or specialized tools. Proposers shall describe the type of notices they intend to use, including placement methods and removal characteristics.

Subsequent Violations

For second and subsequent violations, the vendor may utilize vehicle immobilization (booting) or towing consistent with City-approved policies. The City expects vendors to prioritize booting before towing whenever practical.

Except where otherwise authorized by law or City policy, towing should generally be reserved for repeated violations, chronic non-compliance, or circumstances where booting is impractical or ineffective.

Immediate Enforcement Circumstances

The vendor may tow vehicles immediately, without prior warning or booting, only when 1) legally authorized to do so, 2) the vehicle does not have a valid permit, and 3) any of the following circumstances are involved:

- Fire lane violations;
- Blocked emergency access;
- ADA access violations;
- Safety hazards;
- Obstructed roadways; or
- Other immediate public safety concerns.

Vehicles with a permit may not be towed, even in the above circumstances, unless authorization is received from City Code Enforcement or law enforcement.

Proposers shall explain their enforcement philosophy and provide examples of how they minimize unnecessary towing.

E. Coordination with City Personnel

The selected vendor shall maintain regular communication with City Code Enforcement personnel, Utah County Sheriff's Office personnel assigned to the City, and other City-designated representatives. The vendor shall provide designated points of contact, emergency contact procedures, monthly enforcement summaries, and prompt notification of significant incidents.

F. Appeals and Oversight

The City intends to retain oversight of enforcement actions. Appeals shall not be solely controlled by the vendor. The vendor's system shall support City-administered review processes by providing the following:

- Photographs;
- Timestamps;
- Enforcement notes;
- Vehicle information;
- Permit status history; and
- Supporting documentation.

The City may designate Code Enforcement, Sheriff's Office personnel, or another City department to review appeals and enforcement concerns. The vendor shall immediately suspend or reverse enforcement actions when directed by the City. This includes the removal of boots, suspension of towing actions, or release of vehicles when appropriate. The vendor shall describe procedures for responding to City directives regarding disputed enforcement actions.

G. Fee Transparency and Consumer Protections

To address resident concerns regarding predatory towing practices, proposers shall disclose all fees associated with enforcement activities. Proposals shall identify:

- Boot installation fees;
- Boot removal fees;
- Towing fees;
- Storage fees;
- Administrative fees;
- After-hours fees; and
- Any other charges.

The vendor shall not impose undisclosed fees.

H. Data Ownership, Privacy, and Security

All data generated through the system shall remain the property of the City. The vendor shall comply with all applicable privacy and security laws.

The vendor shall:

- Use data solely for contract performance;
- Not sell resident data;
- Not share resident data except as required by law; and
- Not use data for marketing purposes.

The proposal shall describe:

- Data collection practices;
- Data storage practices;
- Cybersecurity controls;
- Data retention schedules; and
- Incident response procedures.

I. Reporting and Analytics

The system shall provide reporting capabilities, including the following:

- Active permits;
- Permit utilization;
- Guest permit usage;
- Warning notices issued;
- Booting activity;
- Towing activity;
- Enforcement trends;
- Response times;
- Resident complaints; and
- Appeal outcomes.

Reports shall be exportable in commonly used formats.

J. Implementation and Transition

The selected vendor shall provide a complete implementation plan including:

- Project kickoff;
- System configuration;
- Staff training;
- Resident education;
- Public outreach materials; and
- Go-live support.

The City anticipates a clean implementation and does not require migration of an existing permit database. Following selection and contract award, the City desires implementation within approximately twenty (20) days of contract award or as quickly as reasonably practicable

3. COST PROPOSAL

The City seeks a cost-effective solution but reserves the right to select the proposal providing the greatest overall value. Proposals shall clearly identify any costs, including any of the following:

- Implementation costs;
- Software costs;
- Permit management costs;
- Enforcement costs;
- Training costs;
- Support costs;
- Optional services; and
- All resident-facing fees.

---

4. PROPOSAL REQUIREMENTS

Proposals shall include the following:

- **Company information**, including company history, organizational structure, and key personnel.
- **Relevant experience**, including municipal parking enforcement experience, residential permit management experience, and references from comparable jurisdictions.
- **Technical solutions**, including system description, permit management capabilities, and reporting capabilities.
- **Enforcement plan**, including enforcement philosophy, warning procedures, booting procedures, towing procedures, and consumer protection measures.
- **Data security**, including privacy policies, security controls, and data management practices.
- **Implementation plan**, including timeline and training approach.
- **Cost proposal**, detailing pricing and fee schedules.

---

5. EVALUATION CRITERIA AND SCORESHEET

Proposals shall be evaluated using the following weighted criteria:

Category	Weight
Enforcement Philosophy & Resident Safeguards	30%
Technology & Platform Functionality	25%
Experience & Past Performance	20%
Cost & Value	15%
Implementation Timeline & Readiness	10%

Total Possible Score: 100 Points

A. Enforcement Philosophy & Resident Safeguards (30 Points)

Progressive Enforcement Model (10 Points)

- Strong warning-first approach with clear safeguards: 10
- Good approach with minor concerns: 7–9
- Adequate approach: 4–6
- Limited safeguards: 1–3
- Does not meet expectations: 0

Anti-Predatory Towing Protections (10 Points)

- Extensive protections and accountability measures: 10
- Strong protections: 7–9
- Moderate protections: 4–6
- Minimal protections: 1–3
- Insufficient protections: 0

Appeals and City Oversight Support (10 Points)

- Excellent support for City oversight and appeals: 10
- Good support: 7–9
- Adequate support: 4–6
- Limited support: 1–3
- Insufficient support: 0

B. Technology & Platform Functionality (25 Points)

- Permit Management Features (10 Points)
- Resident User Experience (5 Points)
- Reporting & Administrative Tools (5 Points)
- Security & Data Controls (5 Points)

C. Experience & Past Performance (20 Points)

- Municipal Experience (10 Points)
- References & Performance History (10 Points)

D. Cost & Value (15 Points)

- Overall Cost Effectiveness (10 Points)
- Fee Transparency and Reasonableness (5 Points)

E. Implementation Timeline & Readiness (10 Points)

- Ability to Implement Quickly (5 Points)
- Staffing and Operational Readiness (5 Points)
