WATER CONSERVATION

BUILDING SAFETY MONTH

BIKE MONTH

MAYRATHON

LET'S TALK WATER CONSERVATION

Spring has arrived! With the beautiful weather, we want to begin gardening and maintaining our landscape. However, Utah is still in a drought and residents must continue to find ways to decrease the amount of water we use on a daily basis to conserve this precious resource. What can you do as a resident to decrease the amount of water you use while maintaining your yard? Read through the following information to see how you can save water, save money on your utility bill, and prepare your lawns for the season.

- Turn on outside water supply and ensure the supply valve is in the fully open position. Vineyard does not have pressurized irrigation, we use culinary water.
- Test each sprinkler zone to check for leaks, repair them and adjust heads to minimize over spray.
-Check clock settings – there is no need to begin regular watering now!
- Follow the State of Utah's watering guide
- Apply fertilizer sparingly, according to directions on the label. Add several inches of mulch/compost to planter beds. This will hold moisture in, provide nutrients and decrease weeds. When you begin to water, adjust the zone times, to water more deeply and reduce the frequency of watering. Don't allow water to spill into the street. If you have dry spots, adjust the sprinkler heads and if additional water is needed, use a garden hose to only water the dry spot.
-When you begin to mow, raise the cutting level of your mower. The longer grass will require less water. Also consider using a mulching blade – your lawn needs the nutrients of the cut grass.
- Do not water when it rains or if the wind is blowing.
- If you don't already have a smart controller on your sprinkler system here's a link to secure a rebate for a new smart controller

What can you do long term to save water? Consider removing water thirsty turf/grass and create a beautiful water-wise landscape. Follow suggestions from Localscapes.com

Did you know you can create an account to monitor your water usage? It's called Eye on Water. This allows you to see how much water you use and also allows you to create an alert, so you will be notified if you develop a water leak. Contact Utility Billing for assistance on setting up this valuable tool.

What are we doing as a city? We are one of the cities with the lowest per capita water use in the State! To build on this, Vineyard City has committed to using less water for irrigation this year.

We are repairing any leaks in our irrigation systems quickly. We will decrease the amount of water used on our park strips and detention basins. We will increase the height of the grass in the park strips and detention basins. We are removing areas of turf that have little recreational value and adding water-wise landscape. If you need additional assistance, reach out to the Vineyard Water Division.

WORKING TOGETHER WE CAN SAVE MORE OF THIS VALUABLE RESOURCE!

VINEYARD DAYS 2022

PARKS AND SPLASH PAD

The Vineyard City Parks Division is working hard on weed control, dressing up the parks and open spaces, and irrigation. You may see some water breaks or damaged sprinkler heads as the system starts up. Please feel free to let us know if you come across any of these issues in public areas.

The splash pad at Vineyard Grove Park will officially open Saturday May 28. It will be open every day from 10 AM - 8PM, except Thursdays, which is our maintenance day. From time to time, the splash pad may close due to maintenance issues or weather issues. When the splash pad is closed during the season for such events, you will find “splash pad closed” signs at the park and notifications on the Vineyard City Government Facebook page. Please be aware of the splash pad rules as posted at the park for your safety and the safety of others.

MEMORIAL DAY

By Councilmember Tyce Flake

Around this day you will hear it said “all gave some and some gave all”. Memorial Day is about honoring those that made the supreme sacrifice for our liberty. Memorial Day is a United States Federal Holiday observed on the last Monday in May. Originally Memorial Day was called Decoration Day, a day of remembrance for those who died in military service of the United States.

While there is some dispute as to the origin of the day, the first Decoration Day was observed on May 30,1868, under the proclamation by General John A. Logan, national commander of the Grand Army of the Republic (Civil War Veterans). That first observation involved placing flowers on the graves of Union and Confederate soldiers at Arlington National Cemetery. Some believe Gen. Logan planned the first Decoration Day for May 30th, because both Northern and Southern states would have flowers in bloom by that date.

Memorial Day was celebrated on May 30th up to 1971 when the National Holiday Act of 1971, designated the last Monday in May to be the Federal Holiday.

Since the 1950’s on the Thursday before Memorial Day, the soldiers of the 3rd Infantry place small American Flags on each of the more than 260,000 graves in Arlington National Cemetery. They then patrol 24 hours a day through the weekend to ensure the flags remain standing.

It Is a common tradition to visit the graves of loved ones on Memorial Day in Utah and leave flowers; thus, the profusion of potted mums you will find at grocery and other stores in the weeks prior to Memorial Day.

Should you have no family in state to honor on this holiday, might I suggest you with your family visit the Utah Veterans Cemetery & Memorial Park located at 17111 S. Camp Williams Rd. (South Redwood Road). This 30 acre cemetery and memorial is on the east side of the road just south of Bluffdale and north of the Camp Williams Gate. The facilities include a chapel, wall of honor, and a museum featuring military memorabilia and a cemetery.

Note: On Memorial Day, the flag should be flown at half-staff from sunrise until noon only. Then it should be “raised briskly” to the top of the staff until sunset, according to the United

WASTEWATER

Warmer spring weather has arrived at last, and Vineyard Wastewater Collection Department's busy work schedule is underway. Our high-pressure jet truck will be out cleaning sewers so please take extra care when you encounter our crews so they can complete their work as safely as possible.

Sewers are cleaned using a hose and nozzle that sprays water at very high pressure to scour the inside of the pipe. Sometimes this high pressure can force water to travel backward up the service line of homes, causing water to be forced out of drains inside the home.

If you hear a strange noise or notice water coming out of your toilet, it may be our wastewater crew cleaning the sewer in front of your home. If you have any questions or concerns, please feel free to call Vineyard City's Wastewater Manager, Eric Christensen at (385) 338-5449. Thank you and we hope everyone has a safe and happy spring.

OUR HERITAGE

HE ONCE WAS BLIND

The first Vineyard Ward was organized on December 24, 1899, with William D. Lewis as the bishop. He was a friendly farmer with 160 acres of homesteaded and purchased property. One day while driving home from Provo, Bishop Lewis was thrown from his wagon and the back wheel rolled over his head, fracturing his skull. The accident left him with crossed eyes and blindness. He eventually recovered. He attributed the restoration of his sight to the Lord.

STREET SWEEPING

Vineyard Streets Division is beginning the city's street sweeping program to clear away what had accumulated in the streets over the winter. The city began sweeping Thursday, April 14 and will continue for several weeks until all city owned streets are swept. After that, street sweeping will be done routinely as needed. Drivers should take extra caution and be courteous while driving around a slow-moving road sweeper. Street sweeping helps keep our neighborhoods clean, livable, and protects our waterways.

MOSQUITO ABATEMENT

Types of chemicals used by the health department
How you can help protect yourself from mosquitos
Submit an additional service request, or a no-spray request

WHY SHOULD KIDS WEAR A BIKE HELMET?

Wearing a helmet that fits well every time you're on a bike, scooter or skate board helps protect your face, head, and brain if you fall down. That's why it's so important to wear your bike helmet whenever you are on a bike.

Bike helmets are so important that the U.S. government has created safety rules for them. Your helmet should have a sticker that says it meets the rules set by the Consumer Product Safety Commission (CPSC). If your helmet doesn't have a CPSC sticker, ask your mom or dad to get you one that does.

Wear a bike helmet every time you ride, even if you're going for a short ride. And follow these rules:

· Make sure your bike helmet fits you well.

· Always wear your helmet the right way so it will protect you: Make sure it covers your forehead and don't let it tip back. Always fasten the straps.

· Don't wear a hat under your helmet.

· Take care of your helmet and don't throw it around. If it's damaged, it won't protect you as well when you need it.

· Get a new helmet if you fall while you're on your bike and hit your head.

· Put reflective stickers on your helmet so drivers can see you better. This information was taken directly from https://kidshealth.org/en/kids/bike-safety.html Visit this website for more bike safety information.

Follow UCSO here for additional updates about things going on in our community! Do your part and help us by calling if you see or hear anything suspicious. Non-emergency dispatch: 801-794-3970. If it's an emergency, call 911.

SOLICITORS

As the weather warms up, you will likely have solicitors knocking on your door. Solicitor License badges are required in Vineyard. Ask to see their solicitor license badge before interacting with them.

PAVILION RENTALS

All pavilion reservations are now made online by visiting our website and clicking on the "facility rentals" icon at the center of the website page. You will be asked to create an account before completing your reservation. Once you have successfully created your account, you will select the "facility rentals" tab and choose the pavilion you would like to reserve. Dates available for rental will be highlighted in green. Please follow each step to complete the reservation process and a receipt will be emailed you for confirmation.

PAVILIONS CAN BE RENTED AT GROVE & GAMMON

YOUTH COUNCIL

As summer is quickly approaching, our Vineyard Youth Council is working hard to come up with fun activities to promote wonderful connections in the community. We are trying to connect with as many Youth as possible to get the word out about activities. Like our Youth Council Facebook page!

If you have a youth between the ages of 12-18, fill out this form to participate in Vineyard Youth Council.

PADDLE WITH CARE FUNDRAISER

Paddle from Vineyard Beach to AF Marina, and/or join in at the end to learn about water safety, play games, and remember those who've lost their lives on the water. Suggested donation is $25 to paddle. SIGN UP HERE. Sponsored by the Utah Lake Commission.

VINEYARD RACES

UPCOMING RACES

- MAYrathon – Month of May- $25 (DISCOUNTS DO NOT APPLY)
- Vineyard Days 10K, 5K, & Kids 1K – June 4th
- Lazy Triathlon – Month of August- $25 (DISCOUNTS DO NOT APPLY)
- Blizzard 10K, 5K & Kids 1K – November 5th

Households of 3+ persons wanting to register = $30* total for entire family (doesn't include race shirts)

GUIDELINES TO ENSURE CONSISTENT SERVICE:

- If a holiday (only those shown above on calendar) falls on a weekday, service will be delayed one day following the holiday.
- Recycle containers that have trash in them will NOT be dumped as recycling and called into the city.
- All containers MUST be placed outside by 7 a.m.
- Containers should be placed in the street with the wheels against the curb or within 2 feet of blacktop with the front of the container facing the street.
- The container must be placed 4 feet apart from other containers and 8 feet from mailboxes, poles, fences, trees, or parked vehicles for easy access.
- Please break down cardboard boxes.

DIRECTORS MESSAGE

Welcome to the community garden! We are entering our second year of operation and we couldn't be more excited for our gardeners and the community. With funding from our sponsors, we were able to expand the garden and are now able to provide gardens for nineteen individuals, groups, and families. Each box is equipped with an automatic drip system to help conserve water and filled with soil rich in nutrients. There are two pollinator boxes to attract bees run by the Vineyard City Youth Council. We are grateful to provide an opportunity for people in our city to develop gardening skills, connect with others, and grow their own food. A garden is a great way to help with physical, emotional, and mental health. It also provides a calm, relaxing space for residents to visit and see the growing garden. As the new Garden Committee, we are proud to help the community grow.

-Britnee Voorheis

COMMUNITY GARDEN DIRECTOR

COMMUNITY GARDEN GOALS

EXPANSION ACCESS TO GARDENING EDUCATION, FRESH PRODUCE, AND COMMUNITY HEALTH TO VINEYARD RESIDENTS.

A PLACE FOR PEOPLE TO GATHER AND GET TO KNOW OTHERS IN THE COMMUNITY

TO IMPROVE FOOD SECURITY FOR THOSE IN NEED BY PROVIDING GARDEN BEDS FOR INDIVIDUALS, FAMILIES, OR GROUPS TO "ADOPT" ON A YEARLY BASIS

IMPROVE NUTRITIONAL AWARENESS AND PROMOTE HEALTHY EATING HABITS BY ENCOURAGING HOME GARDENING, PROVIDING FRESH, ORGANIC PRODUCE TO RESIDENTS WITH THE USE OF THE PRODUCE STAND, AND OFFERING EDUCATIONAL INFORMATION ON TOPICS SUCH AS NUTRITION AND COOKING.

THANK YOU

Thank you to all those who have helped in the planning and building of the community garden! George Schramm, Sullivan Love, and the parks department have been instrumental in helping make the garden a reality. Thanks to Alexa Dadson and the Vineyard City Youth Council for being involved with the pollinator gardens. A special thank you to our sponsors and donors: Orem Community Hospital, Flagship Homes, Home Center Construction, and Shade Gardens.

COMMUNITY FOCUS

PROVIDE GARDEN OPPORTUNITIES FOR LOCAL RESIDENTS.

IMPROVE OUR ENVIRONMENT BY BEING CONSCIOUS OF WATER CONSERVATIVE PRACTICES.

STRENGTHENING COMMUNITY AND SOCIAL TIES.

Why You Need Utah-Native Plants in Your Garden

No matter your personal skill level, it's worth considering how your choices might affect Utah's ecological systems when planning your garden. Lawns, commercial lots, and some parks are usually unproductive habitats filled with non-native plants. However, adding native plants to the mix can turn an unproductive mess into a self-sustaining ecosystem. Native plants have naturally adapted to Utah's climate and offer ecological benefits for the soil, proving a rich foundation for the ecosystem of plant life you choose to grow.

Native plants make or break garden food chains by providing nutrition, nectar, and shelter for local flora and fauna. About 90% of insect larvae or other plant-eating insects will only eat plants they have co-evolved with.

WHY SHOULD WE CARE ABOUT INSECTS?

1. To continue having happy and healthy plants.
2. There are insects in our gardens, that consume plant-eating bugs.
3. Bugs aid in plant reproduction of the foods we eat, otherwise known as pollinators.

Using native plants to mimic what we see in nature, is a wonderful concept to carry with us to our lawns and gardens. This isn't to say, you should remove any existing plants, Adding natives is the end goal. This means we can provide:
1. Habitat for insects, birds and wildlife
2. Provide food for insects, birds and wildlife
3. To aid in water filtration 4. To improve soil

Introducing Utah native plants would mean you're not only supporting the habitat, and ecosystem of your garden, they will be easily sustainable, because native plants survive regional weather extremes, which provides a more sustainable garden which can sometimes means, less replanting, no pesticides, less watering, little to no pruning, nor fertilizing.

The easiest place to start with is at Utah's Cooperative Extension, they should be able to provide you with, or point you to native plant list for your area.

Why Eat Seasonally?

Produce that is 'in season' refers to food that is grown according to the time of year of its peak growth, more often called native produce, or locally farmed. Produce tends to lose nutritional value over time, during long processes of harvesting, transporting, and storing. In-season, locally grown foods are often fresher and more nutrient-rich because they make it to your table in less time. Seasonal foods are more abundant and often more budget-friendly, not to mention more nutritious. Rather than purchasing year-round strawberries, consider buying them while they're in season (late June through early October).

Quick tip: If you're buying strawberries during the winter, consider buying frozen. They're usually packaged shortly after harvest. Eating seasonally is great for your taste buds and your health! Buying local produce also boosts our economy by supporting hardworking farmers in Utah. In-season foods are often found at your local farmers' market, through Community Supported Agriculture (CSA) programs. The season is just about to start for Utah farmers' markets, so grab your baskets, and enjoy some fresh produce. Learn more at LocalHarvest.org

LATE APRIL PRODUCE IN UTAH

LISTED ARE UTAH'S LATE APRIL SEASON GUIDE

THYME

APRIL, MAY, JUNE, JULY, AUGUST, SEPTEMBER, OCTOBER, & NOVEMBER

Thyme is a tiny twig herb with small leaves that has a slight woodsy smell. The leaves taste faintly of lemon with mint and earth tones. According to certain recipes, the twigs can be implemented in the cooking process, however more often the leaves are used instead. Most commonly used to cook with chicken, soups, potatoes, fish, grilled vegetables, and so much more.

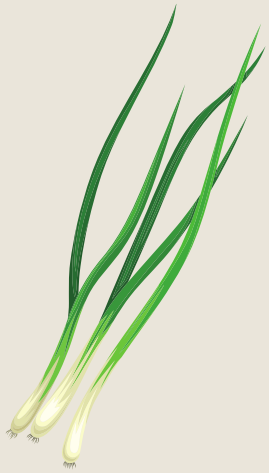

PEA SHOOTS

MARCH, APRIL, & MAY

Pea shoots are the young tendrils of Snow Pea and Snap Pea plants. They have a light pea flavor and are traditionally used in Southeast Asian cuisine, most commonly in fresh salads.

LATE APRIL PRODUCE IN UTAH

CHIVES

MARCH, APRIL, MAY, JUNE, JULY, AUGUST, SEPTEMBER, & OCTOBER

Chives are tall green tubes like herbs, with a delicate onion/garlic flavor. Chives can be enjoyed raw or cooked. This herb is celebrated in so many dishes, such as soups, fish, egg dishes, sauces, dips, potatoes, and more.

MORELS

APRIL, MAY, & JUNE

Morels are wild and honeycomb-like with a hollow center and cone shaped mushroom with a nutty, earthy, and woodsy flavor. Much like all mushrooms, they must be properly identified and cooked before consuming. These are often foraged and can garner a price tag of $20 or more per pound. These rare beauties are oftentimes sautéed with butter and seasoned with salt. Morels pair well with asparagus, salmon, chicken, and cheese.

NETTLES

APRIL, MAY, & JUNE

Nettles are a vegetable with a spinach-like, earthy flavor and are often found on the roadside. It is important to consider foraging in the wild to avoid pesticide load from unfamiliar areas. They are best purchased or harvested when they are young, while the stems are tender and flower buds have not yet appeared. Nettles make great pesto and sauces. Nettles are also a fantastic source of Vitamins A and K, and rich in chlorophyll.

LATE APRIL PRODUCE IN UTAH

ROSEMARY

MAY, JUNE, JULY, AUGUST, SEPTEMBER, OCTOBER, & NOVEMBER

Rosemary is a lovely scented herb, native to the Mediterranean. It is often used to add flavor to sauces, oils, bread, meat, and so much more. It's best paired with poultry, fish, vegetables, and herb butters.

TARRAGON

APRIL, MAY, & JUNE

Tarragon is an herb with a distinct licorice flavor. It is commonly paired with eggs, fresh vegetables, poultry, fish and poultry and is often added to flavor hollandaise sauce.

WATERCRESS

APRIL, MAY, JUNE, & JULY

Watercress is a leafy green vegetable with a pungent, peppery taste that pairs very well with game meats, salad, and is a great savory option to eat with your eggs for breakfast. It's best eaten raw to get the rich vitamins and minerals this superfood contains. Fun fact, watercress delivers twice as much vitamin C as an orange.
