ELECTION RESULTS

CONGRATULATIONS TO OUR NEWLY ELECTED OFFICIALS

Congratulations to Julie Fullmer who is the newly-elected mayor and Chris Judd and John Earnest who are the newly-elected councilmembers for Vineyard. They will each serve a 4-year term.

The Swearing in Ceremony will be held January 2, 2018 at 12:00 noon at City Hall - 240 East Gammon Road.

CHRISTMAS TREE DROP-OFF

Vineyard will have one drop off location for Christmas trees between December 27 - January 5 in the West parking lot at the Vineyard City Hall - 240 E Gammon Road. Please remove all tree bags, ornaments, tinsel and light strands.

VINEYARD HERITAGE COMMISSION CORNER

The Dart was Flying:
Juel Andreasen remembered that in the 1930s her father got the family automobile, the Dart, up to "a very great speed" one night. He instructed Juel to light a match to see what the speedometer revealed. Both were amazed: 24 miles per hour. He immediately slowed down for safety reasons. "Anyone who would travel at that speed is foolish," father said.

SHERIFF'S DEPARTMENT

With the holiday season and an increase in packages being delivered, the Sheriff's Department would like to remind you to remove those packages from your porches as soon as possible to prevent them from being stolen. The Sheriff's would also like to wish everyone a happy and safe holiday season, and to please remember to drive safely!

As always, please immediately report any suspicious activity to the Utah County Sheriff's Office at 801-794-3970.

THE WELLS @ VINEYARD

The Central Utah Water Conservancy District (CUWCD) is beginning the next phase of the CUWCD Water Development Project (CWP) right here in Vineyard. The Wells @ Vineyard, located on the former Geneva Steel property near Mill Road, will include three new wells 24 inches in diameter and 1,500 feet deep, pump houses atop each well and a three-mile-long pipeline to collect the well water and deliver it to local customers. This high-quality drinking water won

"Best-Tasting Water" in the intermountain region for the past two years running and will be supplied to customers in Vineyard, Lehi, Saratoga Springs and Eagle Mountain cities and to the Jordan Valley Water Conservancy District.

Beginning in 2005 with the purchase of Geneva water rights, CWP has helped meet the drinking water needs of fast-growing communities in Vineyard, northwestern Utah County and southwestern Salt Lake County. Since 2007, CUWCD has constructed five wells, more than 23 miles of transmission pipelines, 10 million gallons of storage, a pump station and chlorination facilities. The combination of other surface water rights with Geneva's supply 53,800 acre-feet annually.

The Wells @ Vineyard is the next step in supplying this high-quality drinking water now and into the future. Work is scheduled to begin in December 2017 and continue through July 2020. Future phases will include construction of up to seven additional wells in coming years. As well drilling takes place, nearby residents may notice additional noise and slight vibration near the well sites. Learn more about CWP and The Wells @ Vineyard or sign up for email updates at www.thewellsatvineyard.com.

OUR OUTGOING ELECTED OFFICIALS

With the recent election and the changes made to the Vineyard City Council, we would like to thank Dale Goodman for his service to our city during these last 4 pivotal years of growth.

On January 15, 1998, Randy Farnworth was sworn in as the newest councilmember of Vineyard City. Seven years later, on January 20, 2005, Randy became our second ever mayor. Over the last 20 years, Vineyard has gone from 150 residents to one of the fastest growing city's in America with over 11,000 residents. Thank you, Mayor Farnworth, for over 20 years of service to our beautiful, ever growing city.

THANK YOU, MAYOR FARNWORTH, FOR THE MIRACLE OF VINEYARD

By Xanthe Farnworth

While Mayor Farnworth always credits the council and the staff for any accomplishments or progress that happens in Vineyard, this column focuses on Mayor Farnworth's contributions to and sacrifices for Vineyard.

Taking over the mayoral position when the legendary Rulon Gammon left, Mayor Farnworth found that with only one part-time employee to help, his responsibilities included keeping the beaver dam from flooding the road, repairing tractors and wells, and settling boundary disputes. When Vineyard's dairies and farms began to be sold to developers, his challenges increased. He now had to figure out how to provide infrastructure and services for new developments with a budget of $40,000—and to keep Vineyard from being annexed into Orem!

As we look around us and write Vineyard, Utah as part of our addresses, we may need to recognize four specific miracles facilitated by Mayor Farnworth that allowed us to grow to a thriving, prosperous Vineyard: (1) the surprise support from the State Legislature, (2) the choice of Vineyard for the power plants, (3) the money provided for the Geneva industrial site cleanup, and (4) a way to overcome threats to its existence.

Four Miracles

The first miracle happened during a meeting with some of the state legislators. The meeting turned into a surprise attempt to annex Vineyard into Orem. Mayor Farnworth attended the hours-long-meeting with the town's lawyer, and, in the end, the legislators gave Vineyard the right to exist although to thwart further attempts at annexation, increased density was traded for the right to exist. Although density is always an emotional topic, the increased density does provide the property tax needed to support Vineyard while it waits for the population numbers to attract businesses that pay sales tax.

While it waits for sales taxes to increase, Vineyard benefits from the taxes paid by the power plants. The power plants could have ended up in Wyoming, but, miraculously, because of

constant negotiation and the availability of natural gas and water (left by Geneva Steel), Vineyard became the site of choice, and it now enjoys the benefits of two clean-energy power plants.

Geneva Steel provided many jobs for Utah County's population, but when it closed, Vineyard was left with an industrial waste site, and the recession of 2008 left the developers without the funds to clean it up. The developers approached the State Legislature, and after hundreds and hundreds of meetings lasting more than two years, Vineyard was awarded a Re-development Grant (RDA) of $315 million by virtue of one vote cast by the Utah State Educational Board, who for the first time ever in its history voted contrary to the vote cast by the local school district (Alpine). It was a miraculous and historic event that allowed and still allows Vineyard to continue to develop.

As Vineyard continued to grow, challenges such as the cost of fire and police protection, sewer treatment, and water continued to threaten its existence; however, with every challenge, Mayor Farnworth found a way to move forward, sometimes in miraculous ways.

Other Accomplishments

Miracles often happen after a lot of hard work, and Mayor Farnworth provided much of the hard work over the last 14 years. Sacrificing the opportunity to grow his own business and to spend time with his family, Mayor Farnworth spent more than an estimated 10,000 hours taking care of Vineyard's business. One of Vineyard's first order of business was to provide the basic infrastructure needed for growth. It took seven years of building underground before building above ground could begin. For example, full water and sewer service needed to replace septic systems and wells. And it did, giving Vineyard a water system (unlike other cities and towns) that uses a loop design to allow a line with a water leak to be shut off and repaired while another loop continues to provide water—service to residents can continue uninterrupted.

While the water and sewer lines were being laid, conduits were also added, so the road would not need to be dug up again when fiber optics came through. The new roads also received a seal coat that should extend the life of the roads by 20 years. As the years pass and the infrastructure needs maintenance, the funds set aside now will prevent Vineyard from having to pass a bond (borrow money) to make repairs or update the existing structures.

Other unseen accomplishments involve negotiations with Union Pacific Railroad, Central Utah Project, Central Utah Water Conservancy District, Timpanogos Special Service District, Rocky Mountain Power, Utah Department of Transportation, Utah Transportation Authority, City of Orem, Utah State Legislature, developers, Vineyard residents, Utah Lake Commission, North Pointe Solid Waste Special Service District, Utah Bureau of Reclamation, U.S. Army Corps of Engineers, Alpine School District, The Church of Jesus Christ of Latter-day Saints, Lindon City, Utah County, contractors, etc. Some of the results of these negotiations are evident, some results are not, and some results are still unknown and ongoing; however, the number of entities involved demonstrates the monumental effort it takes to build a town.

As one might suppose, behind each negotiation, meeting, or project lies a story to tell. However, from just this small snapshot of service, we can recognize the debt of gratitude Vineyard owes to Mayor Farnworth for his time, effort, worry, frustration, patience, fortitude, prayers, forgiveness, and faith. Thank you, Mayor Farnworth, for the miracle of Vineyard.

FYI

BROUGHT TO YOU BY THE COMMUNITY DEVELOPMENT DEPARTMENT

Accessory Dwelling Units

What is an Accessory Dwelling Unit?

An accessory dwelling unit (ADU) is an attached dwelling unit to a single-family home, or located above a detached garage serving a single-family home which is located on the same lot as the single-family home designed to be clearly subordinate to the primary dwelling.

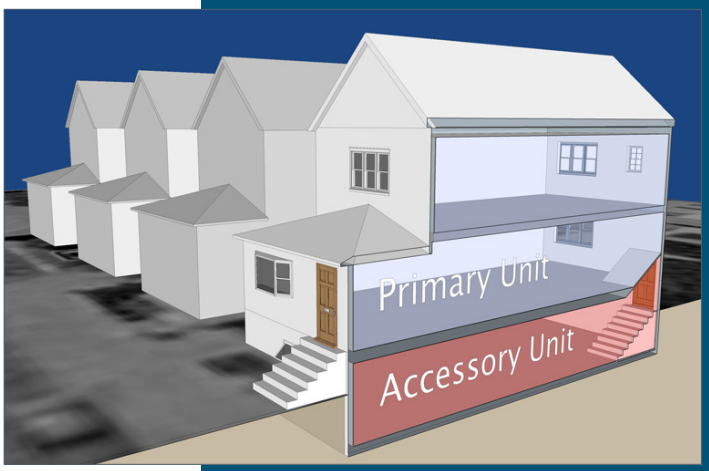

Can my ADU be used as a short-term rental?

Short-term rentals include the use, occupancy, rent, or lease of any portion of a structure, for indirect or direct compensation, for an effective term of thirty (30) days or less. *Short-term rentals are not permitted within any zoning district.*

What are the parking requirements?

An additional two (2) off-street parking spaces are required to accommodate an ADU, whether that be included in the garage or the driveway, to make a total of four (4) spaces.

For additional information about ADU's, please view the FYI in its entirety on Vineyard City's Blog located on our website.

PAVILION RESTROOMS

The restrooms at Gammon Park have been closed for the winter. They will reopen in the Spring. Please plan accordingly.

SNOW REMOVAL

In order to accommodate snow removal, please do not park on the streets from November 1st - March 31st. We need to allow enough room for the plows to get through and clear the roads.
